Die Untersuchung von SMP mit der Projekt-Nr. 04906021707 wurde mit dem nopa Container KYE 200/91 durchgeführt. Dieser hat die Maße 580 x 280 mm, ist 260 mm hoch und hat einen geschlossenen Boden und einen gelochten Filterdeckel. Damit weist der getestete Container das schwierigste Verhältnis zwischen Filteröffnung und Innenvolumen auf und stellt somit den „worst case“ dar. Bei dieser Untersuchung wurde der Nachweis erbracht, dass die nopa Container bei einem normgerecht durchgeführten Sterilisationsverfahren die Forderungen der folgenden Normen hinsichtlich des Sterilisationserfolges, also der erzielten Sterilität, erfüllen:

Die vermehrte Nachfrage zur Validierung und Überprüfung der Reinigung chirurgischer Instrumente gab den Anstoß zur Gründung der SMP GmbH. Basierend auf der Fachkompetenz der Firmengründer im Bereich chirurgischer Instrumente und Hygiene, sowie den Erfahrungen aus verschiedenen Verbundforschungsprojekten bietet die SMP GmbH Dienstleistungen an, die es medizintechnischen Firmen ermöglicht fundierte Aussagen zu Ihren Produkten im Bereich der Wiederaufbereitung und Hygiene zu machen.

*Tested and validated with original
nopa instruments filters and
original nopa instruments components!*

The SMP investigation, with the project no. 04906021707, was carried out with the nopa container KYE 200/91. The dimensions of this are 580 x 280 mm, it is 260 mm high, has a closed bottom and a perforated filter cover. Thus, the tested container has the most demanding ratio between filter opening and interior volume and represents the "worst case". In this investigation, it was verified that the nopa containers fulfil the requirements of the following standards with regard to the sterilization success, i.e. the achieved sterility, after going through a standard-compliant sterilization process:

The increased demand for the validation and testing of cleaning processes for surgical instruments was what initiated the founding of SMP GmbH. Based on the skilled expertise of the company founders in the area of surgical instruments and hygiene, as well as their experience in many different joint research projects, SMP GmbH offers services which allow medical companies to make substantiated statements about their products in the area of reprocessing and hygiene.

Summary of the results:	
If an average value is derived from the individual assessments, the products used reach a value of 6.16 (based on 0 = bad, 10 = very good). See reverse for details, diagram 1	
Conclusions:	
In all, the nopa instruments were assessed by the participants to be equal in value to existing instruments.	
On a scale from 0-10, both the evaluation of almost all of the instruments and the overall rating were above the average value of 5.0, with the highest value even reaching 7.43.
